Figure 1: Challenges to NPPOs resulting from the growth in e-commerce

<p>The growth in e-commerce Worldwide, parcel volume reached 159 billion in 2021, up more than 20% from 2020. By 2027 the volume is expected to increase to 256 billion parcels, at a compound annual growth rate of 8.5% (Pitney Bowes, 2022).</p>	<p>The rapid growth in digital technologies Digital innovations may have outpaced the development and implementation of relevant laws to effectively regulate e-commerce trade.</p>
<p>Increased volume of small parcels This puts pressure on the normal components of phytosanitary export and import systems (e.g. inspection and export certification, inspection at import and verifying shipping documents).</p>	<p>Identifying regulated articles Identifying plants, plant products and other regulated articles on postal and courier pathways is one of the biggest challenges faced by NPPO staff at the border.</p>
